

**Make Your  
SMT Factory  
SMART**

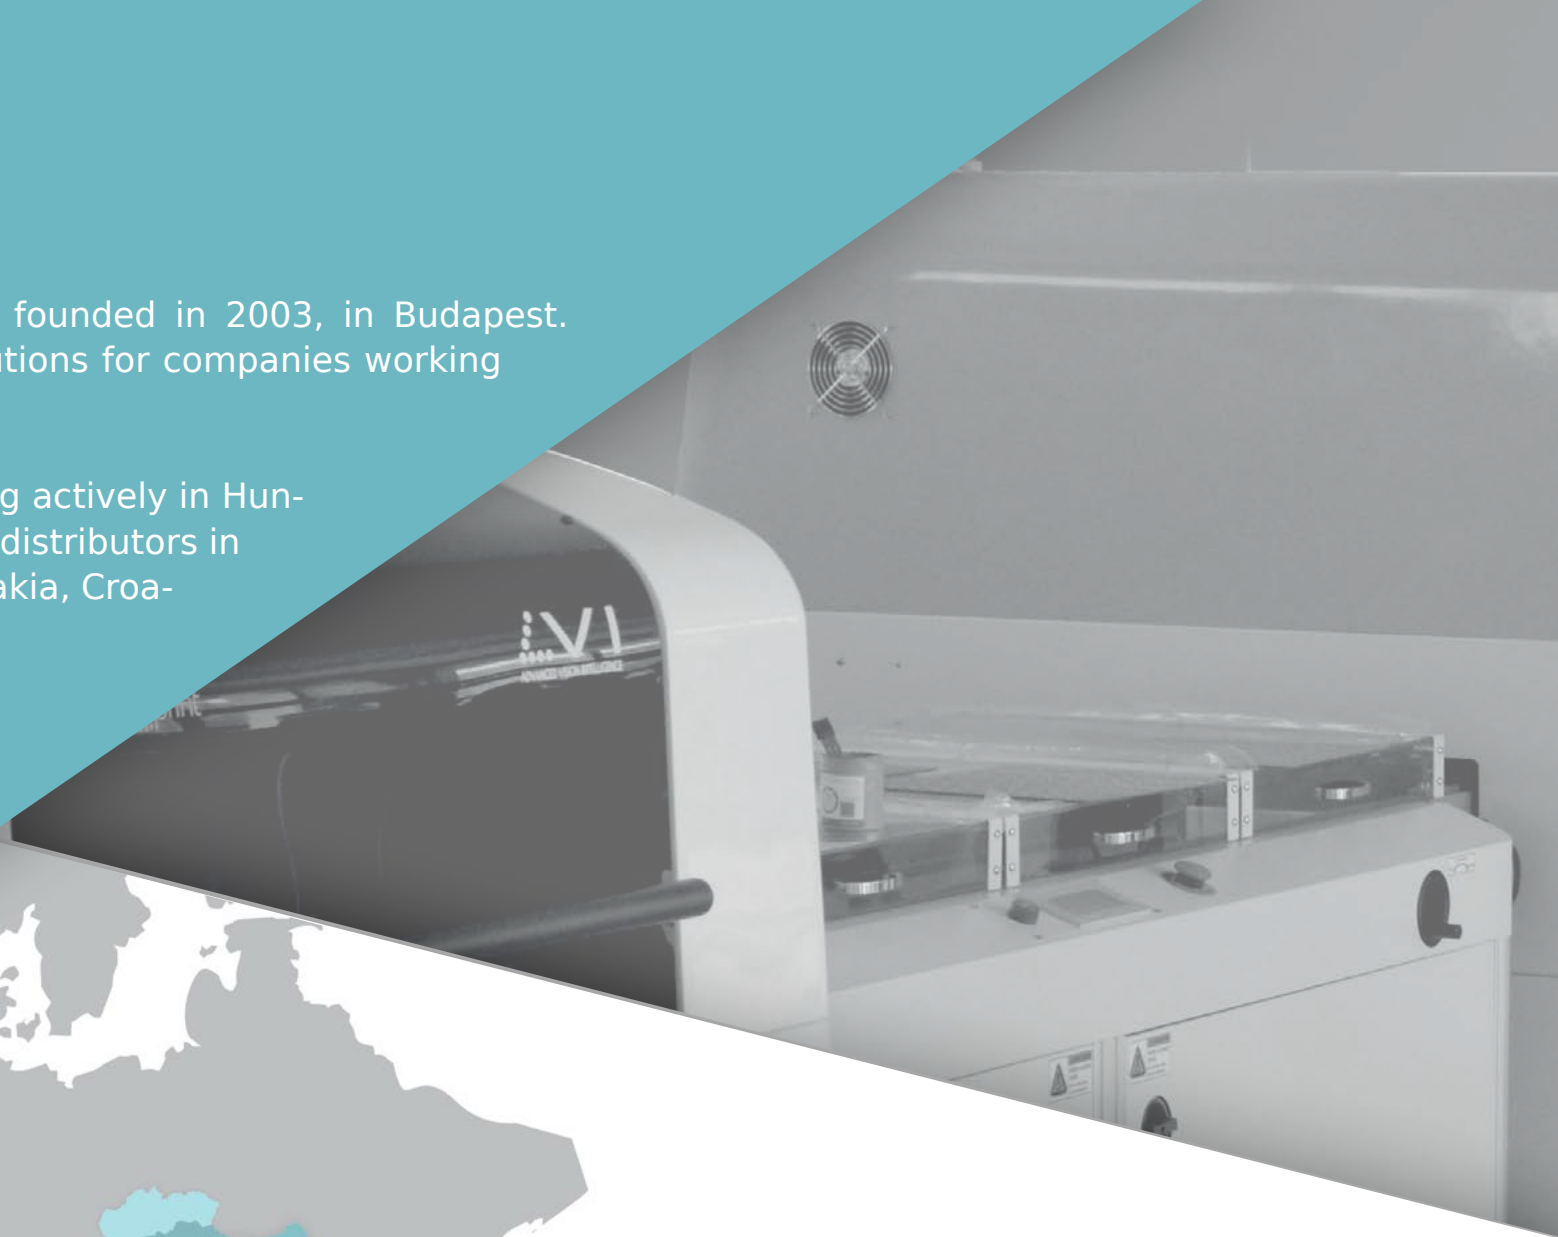

**INTRODUCTION**

InterElectronic Hungary Ltd. was founded in 2003, in Budapest. We provide complex turn-key solutions for companies working in electronic industry.

From the beginning we are working actively in Hungary and Romania. We are official distributors in these countries, as well as in Slovakia, Croatia and Slovenia.

We provide professional consultation, guidance and even integration of projects.

“we are working actively in **Hungary** and **Romania**”

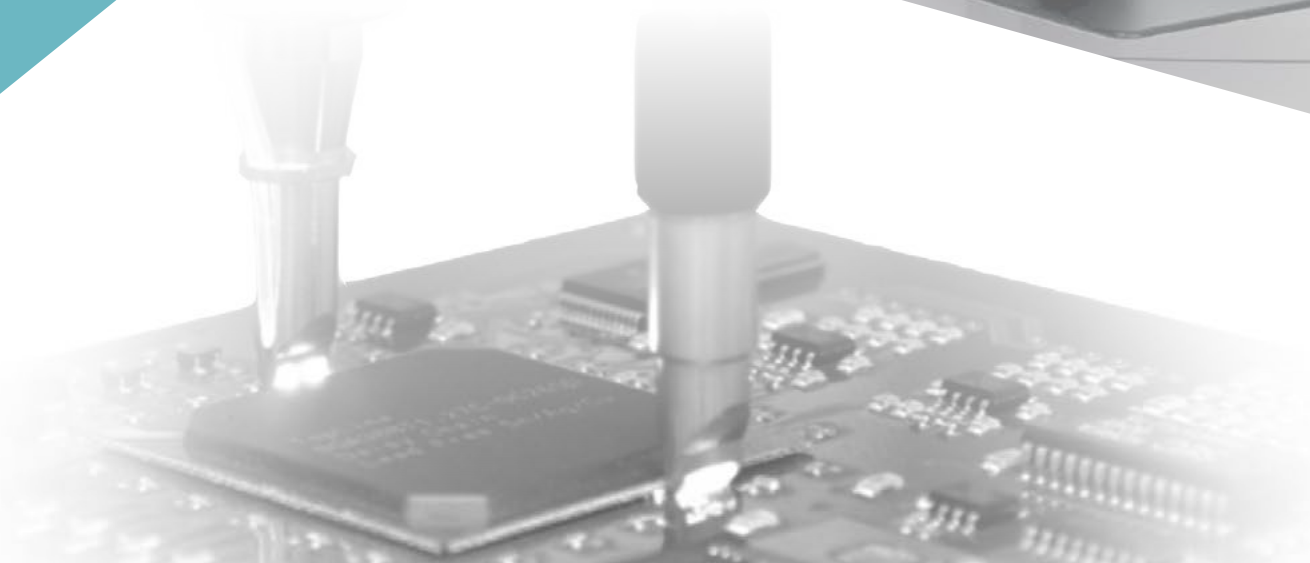

Our portfolio contains all the machines and furnishings to offer lines for SMT or THT manufacturing even for low, medium or high volume production.

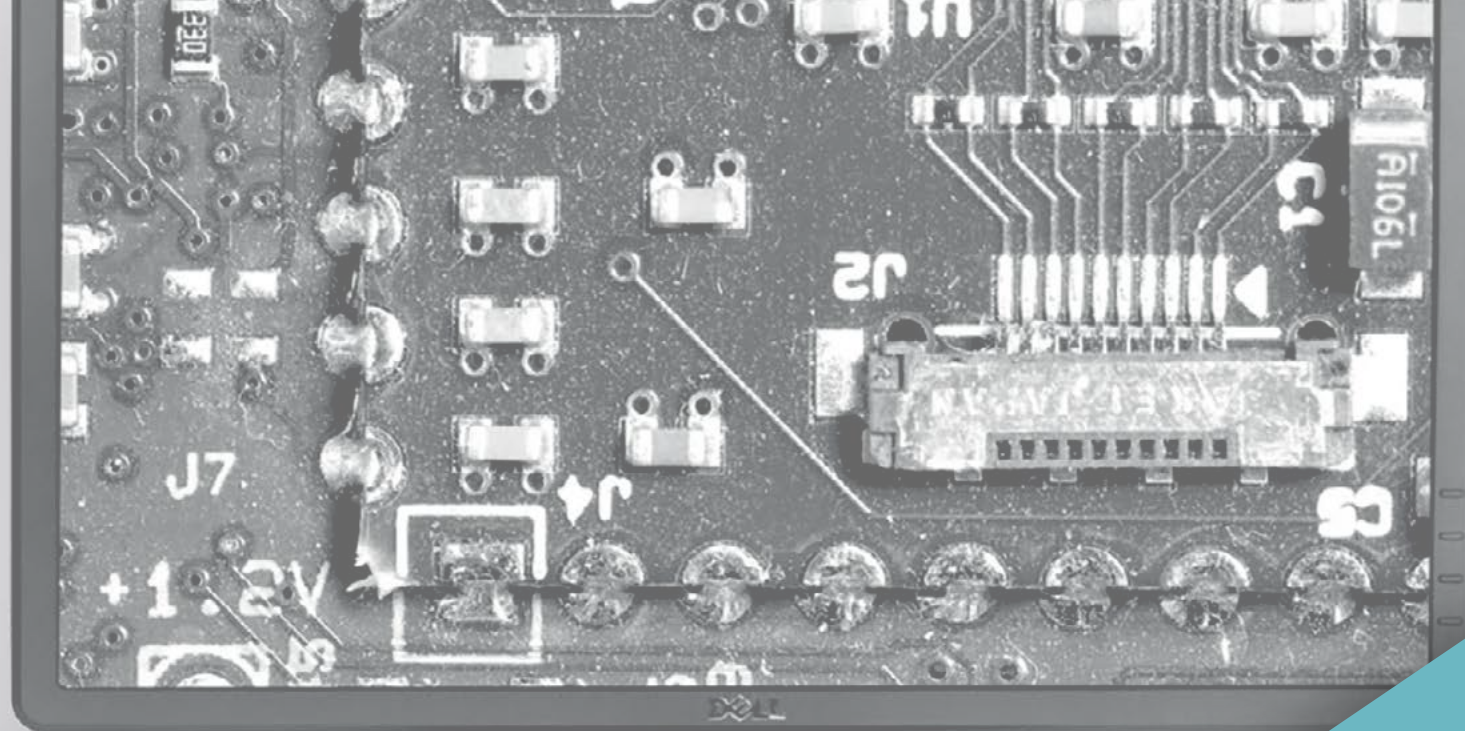

We provide complete solutions for automotive industry expectations as well. InterElectronic is very proud of the fact that for new starting companies during the installation and setup of the machines with the help of our well-trained colleagues we introduce our partners with the electronic production and manufacturing technology. Naturally we can offer tools or solutions for final assembly applications too.

After assembling an electronic board it is very important to control the quality of product. InterElectronic is offering different automated optical inspection (AOI) systems, X-ray equipment (AXI), off-line, in-line or even for first article inspections (FAI).

Our portfolio contains wide range of manual inspection microscopes from simple checking with documentation till 3D measurements.

After inspection the found errors must be repaired.

We offer tools and equipment for surface mounted or through-hole technologies assemblies in both small and large series.

From simple soldering or desoldering station till automatic rework station is in our portfolio, with all hand tools needed for reworking.

For every product sold by the InterElectronic we give full support for warranty period and service support for post warranty time as well. For this by our Partners we have well trained engineers and technicians.

We also give complex support for all of the products provided by us, from installing through trainings to production launch.
